

Unauthorized Mirror sites draw criticism from GEO Project

The Internet (2001-06-23)

General Education Online, originally created in 1995, has had several problems with websites both in the United States and abroad mirroring the General Education Online website in whole or in part. The only official site(s) are on or under the domains findaschool.org, findaschool.net, and findaschool.biz -- all other sites that display either the header, content, or a combination of the two are unauthorized partial or full mirrors. As stated in the copyright notice on the website, all mirrors must be approved by myself on behalf of the General Education Online project. If you do find such a site, please e-mail us with the complete url to the website, so that we can contact the author of the site directly to discuss the situation.

If you have any questions regarding our mirroring policies, please contact me.

Thank you,

Michael Viron
Project Manager / Primary Developer
General Education Online
